MLS DUBORDER™
Dub management made easy

Streamlines the entire dub process - from creating to tracking orders.

SEARCH

ORDER

DUB

MLS DubOrder is an add-on module to your Media Library System (MLS) that works with your MLS database to make your dub orders more efficient – from start to finish. If your organization receives one or one hundred dub requests a week, MLS

DubOrder can help you process dub orders faster, saving time and increasing productivity. Plus, the software can be customized to your specifications to support your current dub system and meet your exact needs.

"Nesbit allows us to have access to all of the information we need at the click of a button."

PRODUCT BENEFITS

Efficient Dub Orders

+ Easily search for the assets you want dubbed

+ Search results are automatically exported to your Dub Order System

+ Additional instructions can be added to existing dub orders

Detailed Reports

+ Inquiries can be sorted by title, user, department, company or account code

+ Access can be limited to query-only functions
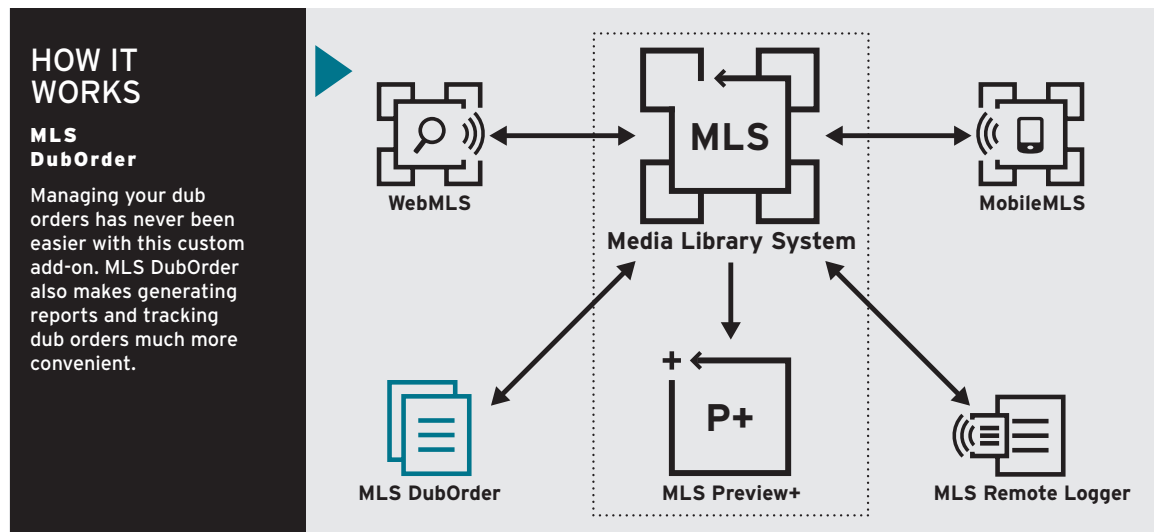

+ Report templates can be custom designed and saved

Smart Order Tracking

+ Know the status of your orders: completed, partially fulfilled or still open

+ Order details can include technical specifications and shipping instructions

+ Redundant dub order requests can be avoided

Cost-Effective Processes

+ Accurate MLS search reduces incorrect dub orders

+ Automatic functions help increase productivity

+ Customization ensures compatibility with your existing system
