NESBIT
SYSTEMS, Inc.

WEB MLS™
Easy, online access to your MLS

Conveniently search and share your media library via the Internet.

ORDER

WebMLS is an essential add-on component to Media Library System (MLS) that lets you access your MLS online and share information with remote users around the globe. Access is limited to authorized users to help keep your system secure. Plus, you control what information users can view. With WebMLS, you don't have to be on-site to view your media assets anymore. All you need is an Internet connection.

"Nesbit gives me 'on demand' access to our video library that is essential in our fast paced production environment."

ARCHIVIST, THE NEWSHOUR
